Arcanum Shinrai - White Paper v2.0

1. Introduction

Arcanum Shinrai is a next-generation cryptocurrency project designed to stand resilient in the face of upcoming technological disruptions. It unifies quantum-resistant cryptography, artificial intelligence, and scalable decentralized governance.

2. Vision & Mission

Vision: To empower a global, decentralized community with intelligent, post-quantum, and transparent blockchain systems.

Mission: To build an AI-integrated blockchain ecosystem with robust quantum-resistant architecture and a truly community-driven governance model.

3. Problem Statement

- Traditional blockchains are vulnerable to quantum attacks.

- Governance is often centralized.

- Smart contracts lack adaptability.

- Fees and scalability are issues.

4. The Arcanum Shinrai Solution

- Quantum-resistant cryptography.

- AI-augmented governance.

- Modular, scalable blockchain.

- Community-powered DAO.

5. Architecture Overview

- Wallet Layer: Quantum-safe keypairs.

- AI Layer: Proposal analysis oracles.

- Smart Contracts: AI-assisted.

- Governance Layer: Snapshot DAO.

- Data Layer: IPFS + optional ZK.

6. Tokenomics

DAO: 50%, Community: 20%, Founders: 15%, Ecosystem: 10%, Advisors: 5%

Total: 100,000,000 $ARKAI

7. Roadmap

Month 1-2: White paper, DAO, site

Month 3: Testnet

Month 4: Airdrop & Pre-sale

Month 5: Launch

Month 6: Governance live

8. Legal & Compliance

No guarantee of returns. Open-source, DAO-governed. KYC/AML enforced as needed.

9. Final Statement

$ARKAI is the intelligent, quantum-resilient, community-driven protocol of the future.
